Licenses

March 18, 2021 — Policy

What's up with these new not-open source licenses?

Justin Colannino

Understanding the movement of 'single source' companies from 'open source' to 'source available' licenses

In the last nine months since joining GitHub's policy team, I've been asked repeatedly about a two-year trend in the open source ecosystem: 'single source' open source companies scrapping their Open Source Initiative-approved open source license for a 'source available' license. This trend is unfolding as cloud infrastructure changes the way developers interact with the dependencies in their stack.
